THE SEED SITUATION

Throughout the years Scotts have tried to furnish the best in farm seeds. We have always felt that noxious weed free, high germinating, quality seed actually cost less because it produces more satisfactory crops. You will find Scotts Seeds are better than can generally be obtained elsewhere.

As we size up the situation there appears to be an ample supply of most farm seeds. Many are lower in price and only a few higher. The average seeding should be less expensive than a year ago.

ALFALFA AND CLOVERS - Alfalfa, with the exception of Buffalo and Ranger wilt resistant varieties, is more plentiful and prices are lower. Medium red and Mammoth clover seed crops were smaller than a year ago but there is enough seed particularly if some alfalfa and other legumes are substituted where possible. Cumberland and Midland are recommended for disease resistance and winter hardiness.

Grasses - There is a big reduction in price on brome, orchard, bluegrass, reed canary grass and meadow fescue. Our brome and orchard grass are the best we've seen in several years. Certified Kentucky 31 and Certified Alta fescues are offered and also Certified Lincoln brome grass.

MEADOW AND PASTURE MIXTURES - Only top quality clean seed is used in Scotts Mixtures. They are convenient to order and sow and suited to a wide range of seeding conditions.

OATS AND BARLEY - Everyone who wants new seed oats should be able to get it this year. We hope to offer Eaton and Ajax on our January price list. Barley has been up for malting purposes so prices are high and supplies limited. Wisconsin 38 and Bay are smooth awned and high yielding with Bay slightly stiffer strawed. Treating is recommended for all spring grains for the control of smuts and seeding diseases.

HYBRID CORN - The supply will certainly be smaller than for the past several years but we believe there will be enough for everyone. Appearance of seed may not be as nice as some years but producing ability is there and germinations are high. Both our supply and quality are good and more of the earlier hybrids are available than last year.

WHEN TO ORDER - Order seed early. We are in position to make some December shipments. Freight deliveries are fairly prompt but it's a good idea to play safe and order early.

SCOTTS CROP-LAND PASTURE MIXTURE

\$60.00 cwt.

A high carrying capacity pasture mixture for seeding where rotation crop land is to be used for permanent pasture. Apply fertilizer, and lime where needed, and follow recommended seeding methods.

Scotts Crop-Land Mix is suggested where the field is to be left in pasture for at least five years and where heavy grazing is desired. Properly handled this mixture will produce throughout the entire season and give returns comparable to those from other crops.

Contains Ladino, Louisiana White Clover, Birdsfoot Trefoil, Kentucky Bluegrass, Alta Fescue, Reed Canary Grass, Brome Grass, Orchard Grass, Perennial Ryegrass and Redtop. Sow 25—30 pounds per acre.

SCOTTS SPRING PASTURE MIXTURE

\$35.00 cwt.

A balanced, widely used mixture of legumes and grasses containing ladino clover for establishing highly productive permanent pastures. Contains alfalfa, red clover, alsike, ladino, Kentucky bluegrass, redtop, timothy, orchard grass and ryegrass.

SPECIAL PASTURE MIXTURE

\$22.50 cwt.

A good mixture where lespedeza can be grown successfully. Forty percent legumes by weight. Contains alsike, white clover, lespedeza, ryegrass, redtop, timothy and orchard grass.

Pasture mixtures are sown 20 to 25 lbs. per acre for new seedings and 10 to 15 lbs. per acre for reseeding an established pasture.

TREATED HYBRID SEED CORN

Scotts Hybrid Corn has been graded for width, length and thickness and will plant easily and accurately in any make of planter. It is treated for protection against disease. The round kernels are graded uniformly and will yield just as well as the flats but special plates are usually required for accurate planting. These plates are available for most standard planters.

Silage Blend Flats—EARLY-LATE.....\$6.50 per bu.

Kentucky 203 (White) flat grade only.....\$10.75 per bu.

ROUNDS—Only medium and large rounds are offered. Carefully graded, high in germination, produce strong plants, and will yield as well as flats at a saving in seed cost. The same grades are available each year.

SCOTTS 11—Slightly earlier than Ohio M-15. Large ears for an early hybrid. Has out-yielded Ohio M-15. Sound dark yellow ears. Suited to short season or late planting.

SCOTTS 22—The maturity of Ohio M-20 and M-34. Has outproduced its maturity class on many different farms. Good roots, sound ears, good quality fodder, dries out quickly.

SCOTTS 33—Maturity of K Hybrids. A real producer with disease and smut resistance. Easy husking, nice fodder not as tall as K 24. Will pick clean and crib early.

SCOTTS 66—One of the best medium maturing hybrids in the corn belt. Disease resistant, husks easily, strong roots, high yields on a wide variety of soils.

SCOTTS 60W—A white hybrid, medium sized fodder and ears. A good producer in its maturity class. Strong roots and stalks, good crib corn. Thoroughly tested in the corn belt.

HYBRID BLENDS FOR SILAGE—The early blend is for short season use, the late for full season plantings. Uniformly graded for width, length and thickness. Maturity variation in each not over 10 days. Will plant 8—10 acres per bushel. High yields of fodder and ears.

SCOTTS 75—Slightly earlier and not quite as tall as most of the C Hybrids, blight resistant, sturdy stalks, large dark yellow ears, bred for handy size and high yields. Seed supplies limited.

SCOTTS 77—Maturity of Ohio C-38 and Iowa 4059 but cribs earlier. Corn borer resistant, large deepkerneled ears that husk clean and easily. Seed supplies limited.

SCOTTS 99—Maturity of U. S. 13. Bred for more corn borer resistance and higher yield than U. S. 13. Dark green color. Can be used for ensilage or crib corn.
